

Sign Up in [Adafruit](#)

Go to io.adafruit.com

Follow the below steps to create feeds in Adafruit.

(NOTE: The feed name is case sensitive, So it should be as same as in the program)

Step7:

Choose feed

Toggle: A toggle button is useful if you have an ON or OFF type of state. You can configure what values are sent on press and release.

If you have lot of feeds, you may want to use the search field. You can also create a feed quickly below.

Group / Feed	Last value	Recorded
<input checked="" type="checkbox"/> Led_1	1	2 hours ago

Step8:

Block settings

In this final step, you can give your block a title and see a preview of how it will look. Customize the look and feel of your block with the remaining settings. When you are ready, click the "Create Block" button to send it to your dashboard.

Block Title (optional)

Button On Text

Button Off Text

Block Preview

Led_1

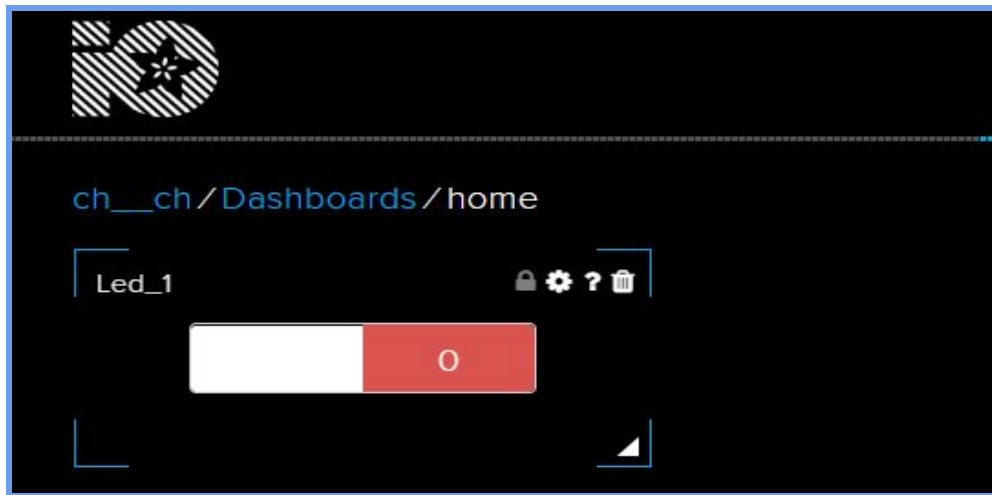

0

Toggle A toggle button is useful if you have an ON or OFF type of state. You can configure what values are sent on press and release.

Test Value

Published Value

0 bytes

We can change the properties of the feed by clicking on the settings icon.

Note: Follow the above steps to create feeds in the adafruit dashboard. Make sure the feed names are as same as given in the below codes.
